

# The Ultimate in Mobile Flexibility

We have multiple emails, credit cards, social accounts... But why just one mobile number? FLEX is here to change that.

Manage all of your contacts, texts, and voicemails from one convenient app. Add separate numbers for all facets of your busy life and experience true mobile FLEXibility.

Unlimited calling, texting and separate voicemail with each FLEX number.

## FEATURES

FLEX keeps your personal number just that—**personal**.

Today, in our mobile world, more people are freelancing and starting home based and small businesses than ever before. Your smartphone has become your lifeline that allows you to work anywhere, be accessible at any time and never miss those important calls.

With FLEX, you'll always have a professional business identity. It's a smarter way to do control your busy life!

### MULTIPLE NUMBERS

We're not talking about call forwarding here. You can have up to 5 unique numbers on your phone, all with their own contacts, texting, and voicemail, and choice of area code

### UNLIMITED TEXTING

That's right. FREE unlimited texting. What's more is that FLEX keeps all your texts, calls, and voicemails in one convenient feed.

### NOT VOIP

FLEX utilizes your existing carrier for an actual cellular call, no more unreliable wifi calling, no more bad connections... Only the highest quality calling.

### A REAL PHONE NUMBER

Unlike Google Voice or other services that utilize "virtual" numbers, FLEX gives you a real phone number. Go ahead, put it on your business cards and your email signature.

### INTERNATIONAL CALLING

The world has gotten smaller! Have friends and family in other countries? With FLEX, those calls become local calls. Looks like the world just got cheaper too!

### TRUE SEPARATION

A line for business, a line for personal, and separate contacts for both. Know who is calling at all times, and which of your numbers they are calling.
